

Lakes and Beaches Committee

May 6, 2024

Members present: Kent Campbell-Chair, Desiree Rodriguez-Co-Chair, Brian Fink, Greg Kirkpatrick, Tom Selm, Mark Winchester

1. Mike Cook from the Jefferson County Stormwater Management Division gave a presentation on stormwater inflow and its effect on lakes, and an overview of potential processes to reduce sedimentation. Velocity is more detrimental than volume.
2. Clean Flo's recommendations for Summer Lake were received and distributed to the committee members. Meaningful discussion will occur when recommendations for all lakes have been received.
3. Anticipate Electrofishing survey to be completed in May. Will be scheduled by DOC representatives.
4. Rinse station survey results showed a clear preference for a hand pump, use of lake water, and either a knee high or hand held spray nozzle. One committee member will seek design recommendations.
5. Tom Hayes tentatively scheduled beach sand delivery for Tuesday, May 14th, but may reschedule later due to weather (rain forecasted).
6. Food truck vendors have not returned calls. 4Lakes remains interested. A committee member will try additional vendors.
