

Raintree Plantation Maintenance Department  
Report of activities for May 2024  
Board Meeting

- Bad storm on 5/8/2024. Cleared debris washed into ditches and culverts from heavy rains. Removed trees and limbs down on the roads from high winds and hail.
- Cutting grass when weather and work load permits.
- Trimmed back tree limbs overhanging the roads and causing “Line of sight” issues.
- Made repairs to the center island irrigation system and opened it up for the summer.
- Please remember that dumping grass and shrub cuttings in our ditches is a rules violation and very harmful to the function of the ditches.
