

Lakes and Beaches Committee

June 3, 2024

6:00 pm

Members present: Kent Campbell-Chair, Brian Fink, Greg Kirkpatrick, Tom Selm, Mark Winchester

1. Clean Flo has provided some new quotes with “shared services” where Raintree residents would assist in the maintenance of equipment and application of some treatments.
2. Mark has received two quotes from engineering firms regarding the erosion seen on the Summer/Winter Lakes spillway, and awaits a third. An evaluation would cost a minimum of \$10,000 on the quotes received so far. More to follow.
3. Brian shared a drawing of a potential rinse station and will pursue quotes on boring needed to provide water from the lake to the station. Concerns regarding erosion in the area between the stairs and water were voiced. Caution tape will be used to limit traffic, and reduce erosion to the likely site of the rinse station.
4. Advanced Wildlife Control will be here on June 6th to review the lakes and begin the varmint trapping process. Traps will be marked, but everyone should exercise caution when near traps to avoid injury.
